# FIT 2101

## Assignment 2

### Retrospective

**Team Members of Group A4**

Jacky Foo

Kuan Wai Shuet

Arvind Chandran

Hou Ruiqian

Joshua Ee Xian Zhen

Jordan Poon Kee Liang

# Retrospective

## Main Criteria

- Has the retrospective identified genuine problems with the team's policies and practices?
- What strategies has the team decided on to address any identified problems?
- Are those strategies likely to work?

What went well?	<ul style="list-style-type: none"><li>• Communication between all team members went very well</li><li>• MVP is much better than expected.</li><li>• Record the time taken for each task of a user story. It will be useful for further time estimation</li></ul>
What could have been done better?	<ul style="list-style-type: none"><li>• Trello, it is unclear how tasks are allocated.</li><li>• Time estimation for each task.</li><li>• Branching and merging with Github</li><li>• User stories could have been written better</li></ul>
What will we try to fix?	<ul style="list-style-type: none"><li>• Usage of Trello for user stories, backlogs, features</li><li>• Creating more branches in git based on each developer's name instead of function names. This can possibly fix the conflict issue every time each team member tries to pull from git.</li></ul>
What questions do we have ?	-
