Design Choices

Colour Choice:
- Blue
  - Most of our user interface uses variations of the colour Blue as it is a colour which is good as a background colour and compliments the text and diagrams throughout the application.

Font:
- Roboto:
  - Pages used:
    - Admin Page
- Poppins
  - Pages used:
    - Sign In Page
    - Dashboard

User Interface:
- The application is Desktop friendly as it is the most common platform that our application will be accessed on.
- The application is also Mobile friendly as it will be easy to access by their mobile devices, which are easily accessible by all users in this modern day.

Sign In Page:
- A very simple and clean design is implemented as we do not want to complicate the choices for our users when they are signing up or signing in.
- Sign up page only requires very few inputs to enable a swift sign up process for all our users.
- Users can choose to login on the Sign in page, and also have the option to reset their password, where an email containing a reset link will be sent to their email address.

Dashboard:
- The dashboard contains a side menu for ease of navigation throughout the application.
- Users can see their profile details and also navigate to other pages in the application.
- The main dashboard page will consist of the data to be displayed, which will be selected by the user.

Admin Page:
- The Superuser is able to view the details of all users on this page
- The layout of the page will be fairly simple and only consists of a table with the details of all users.
- Superusers are able to edit or delete a user from the list.
